\* Common with Fashion Design & Garment Technology.

\*\* Common with All Branches.

# Student Centered Activities will comprise of various co-curricular activities like games, hobby clubs, seminars, declamation contests, Extension lectures, NCC, NSS and cultural activities etc.

+ Industrial visit compulsory at minimum 2 Industries or Department.

Note: 1- Each period will be 50 minutes. 2- Each session will be of 16 weeks. 3- Effective teaching will be at least 12.5 weeks.

# **COMPUTER AIDED TEXTILE DESIGN - IV**

Subject Code : 196001

#### RATIONALE

The term CAD has found its ways into all major discipline that have got anything to do with designing or drafting techniques. The major object of this course is to expose the students to different software available in the fields of textile design industry so that they are able to use those software in the design and construction of various textiles.

#### **DETAILED CONTENTS**

#### Related theory for practical exercise

- 1. Use of CATD in various end uses in multicolor viz.
  - dress material,
  - upholstery, furnishing,
  - label,
- 2. Use of computer for embroidery designs.
- 3. Use of CATD in various knitting designs.

#### PRACTICALEXERCISES

- 1. Create design in accordance of the project in coral and convert the file in JPEG,TIFF & other image soft wares
- 2. Scan your hand printed designs and convert them using coral draw for furnishing fabrics
- 3. Use of symbols ,multicolor designs to print Bromides of different colors in black through Laser printer for exposing photographic screens
- 4. Design a logo for your production unit with return words also.
- 5. Different scanned images to be combined for final design.
- 6. Convert surface design to woven design & vice-versa
- 7. Designs to have perfect repeats for final woven or printed fabrics.

#### **RECOMMENDED BOOKS**

- 1. CAD in clothing and textiles by W. Aldrich
- 2. A Magazine on computer in the world of textiles
- 3. Software, Coral draw, Photoshop, Ned graphic

# **TEXTILE TESTING AND QUALITY CONTROL - II**

Subject Code : 196002

#### RATIONALE

Diploma holders in textile design are responsible for testing and quality control of yarn and fabric at the shop floor. Thus in this subject, students will be made fully aware of different quality standards and maintenance during manufacturing processes for the total quality concept.

#### **DETAILED CONTENTS**

#### Theory

- 1. Moisture relation and testing. Definition of moisture regains. Moisture content, absolute humidity and relative humidity. Relation between regain and moisture contents humidity. Standard laboratory conditioned measurement of moisture regain by drying ovens and electronic moisture meter.
- 2. Definition of crimp and take-up. Measurement of crimp by crimp meter. Crimp, take up and fabric properties.
- 3. Fabric thickness and its measurement. Measurement of fabric weight.
- 4. Introduction of fabric stiffness, Handle and drape. Measurement of fabric stiffness, Drape meter and its working
- 5. Crease recovery and its measurement
- 6. Pilling of fabric. Its measurement
- 7. Testing of fabric strength. (Tensile, tearing and bursting strength)
- 8. Fabric shrinkage and its measurement
- 9. Water absorbency properties of various fabrics
- 10. Flammability, factors affecting flammability of fabrics. Measurement of flammability
- 11. Concepts of serviceability, wear and abrasion, their measurement and interpretation of results.

# PRACTICALEXERCISES

- 1. Measure of moisture content of yarn and fabric by electronic moisture meter and drying oven
- 2. Crimp measurement of warp and weft of fabric with the help of crimp meter
- 3. Measurement of fabric thickness by thickness tester

| L | Т | Р |
|---|---|---|
| 3 | - | 3 |

- 4. Measurement of fabric weight
  - A- Measure of stiffness of fabric
  - B- Use of Drape meter
- 5. Measurement of crease, recovery angle of fabric (warp and weft direction)
- 6. Use of pilling tester
- 7. Measurement of tensile, bursting and tearing strength tests with the help of tensile strength tester, bursting strength tester and tearing strength tester
- 8. Use of Laundrometer for measurement of shrinkage
- 9. Use of water absorbency tester to measure water absorbency properties of fabric
- 10. Flammability testing with the help of flammability tester
- 11. Testing with wear and abrasion tester.

# **RECOMMENDED BOOKS**

- 1. Textile testing by JE Booth
- 2. Textile Testing by Grover and Hambey
- 3. Textile Testing by Angapan
- 4. Textile Testing by John H. Skinkle

# MAJOR PROJECT WORK

#### Subject Code : 196003

| L | Т | Р  |
|---|---|----|
| 2 | - | 11 |

#### RATIONALE

The purpose of introducing the projects are to enable the students to apply the knowledge, skills and attitudes acquired during the entire course of the solution of real life problems. Each student will be assigned a specific problem. The student will have to go through the entire problem solving right from conception of design up to the execution of design. It is expected that students will be sent to various textile industry for about 6-8 weeks at a stretch and they will be asked to take live problem from the field as project work.

Identification of textile industry and project activities which can be taken by the students for project work should begin well in advance (say in the beginning of third year). Students should also be asked to identify suitable textile industry and project activities which can be taken by them. One teacher is expected to guide, supervise and evaluate the project work of 5-7 students.

#### **DETAILED CONTENTS**

The assessment of project work shall be based on:

- 1- Definition of the problem
- 2- Explain the approach towards solution of the problem
- 3- Developing and sketching-developing alternatives
- 4- Color scheme-developing alternatives
- 5- Final design-developing alternatives
- 6- Fabric selection/yarn selection
- 7- Quality of print/Weave
- 8- Procedure adopted by student in originality of the design concepts
- 9- Initiative and participation of students

#### SUGGESTED PROBLEMS FOR PROJECT WORK

These problems may be reproduced on graph paper/design paper and later on, in the production of fabric by weaving or printing.

- 1. Indian mythology depicting a Mahabharata scene
- 2. Tantric art/Mantric art on fabric/glass painting.
- 3. Hand print with the help of acramine dyes

- 4. Nozil printing with intricate design.
- 5. Production of various designs on manmade fabric by heat treatment
- 6. Production of white design(crepe)on white grounds(self patterns) on cotton
- 7. Texture effects on different types of fabrics
- 8. Wash down effect on various dyed fabrics using enzymes, hypo chlorides, permanganates and pumice stores
- 9. Consideration of weave and colored patterns
- 10. Causes of lab to variations in dying
- 11. Preparation of different shades and their comparability with similar dyes
- 12. Dying of samples by changing dying parameters

# INSTRUCTIONAL STRATEGY

A viva-voce examination shall be conducted at the end of the project for assessing the work of the student. The examination committee for this purpose shall consist of a professional designer, teacher who has guided the project. The project work should be properly displayed by the student.

# MANAGEMENT

Subject Code : 106001

#### RATIONALE

The knowledge of this subject is required for all engineers/technicians who wish to choose industry/field as their career. This course will also help those engineers who want to open their own industrial units. This course is designed to develop understanding of various functions of management, marketing techniques, various entrepreneurial support systems and preparation of project report.

#### **DETAILED CONTENTS**

#### 1. Introduction to management

- Principles of management
- Functions of management
- Importance of management
- Scope of management
- Qualities of management
- Levels of management

#### 2. Entrepreneurship and its support system

- HConcept/meaning/need
- Qualities of an entrepreneur
- Support system- DIC, Commercial banks, SIDBI, IDBI, NABARD

#### 3. Market survey and opportunity identification

- How to start a small scale industry
- Procedures for registration of small scale Industry (S.S.I)
- List of items reserved for exclusive manufacturer in S.S.I
- Assessment of demand and supply in potential areas of growth
- Consideration in product selection

#### 4. Communication

- Meaning, need, scope of communication
- Importance of communication

| L | Т | Р |
|---|---|---|
| 3 | - | - |

- Types of communication
- Barriers of communication

# 5. Environmental consideration

- Concept of ecology & environment
- Types of pollution(air, water. Noise)
- Factors contributing to Air, water & noise pollution
- Measures to control air, water & noise pollution

### 6. Financial Management

- Introduction to financial management
- Functions
- Objectives
- Taxes: income tax, sales tax, excise duty, custom duty, value added tax

### 7. Miscellaneous

- Leadership
- Motivation
- Labour
- Workers participation in management

# **RECOMMENDED BOOKS**

- 1. Marketing Management by Phillip Kotler, Prentice Hall of India
- 2. Industrial Engineering and Management by OP Khanna, Dhanpat Rai & Sons, Delhi
- 3. Handbook of Entrepreneurship by BS Rathore, JS Saini

# **EMPLOYABILITY SKILLS**

#### Subject Code : 016055

#### RATIONALE

Diploma holders are required to not only possess subject related knowledge but also soft skills to get good jobs and to rise steadily at their workplace. This subject is included to develop employability skills amongst the students.

#### **DETAILED CONTENTS**

#### Unit I:

- Technical Education & Industrial scenario. •
- Competency required of an engineer. •

#### Unit II:

- Professional Engineer desirable values and ethics and their development.
- Relation between engineering profession, society and environment •

#### Unit III.

#### **Effective Communication**

- Reading & Active Listening Skills
- Speaking •
- Writing
- Presentation Technique/Seminar •
- Group discussion •

#### Unit IV:

#### **Managing project**

- Leadership •
- Motivation
- Time management
- Resource management
- Interpersonal relationship •

#### Unit V:

#### **Preparing for Employment**

Searching for job/job hunting •

(10 periods)

(12 periods)

(06 periods)

(06 periods)

• Employability skills for Diploma students by Dr. S.K. Singh, Vayu Education, New Delhi

#### • Resume & CV Writing

- Interview technique in personal interview telephonic interview, panel
- Interview, group interview, video conferencing

# Unit VI:

#### Self Management

- Selfawareness
- Stress Management
- Conflict resolution

# Unit VII:

- Creativity, Innovation and Intellectual property right
- Concept and need in present time for an engineer

# Unit VIII:

# **Rules & Ethics**

• Basic rules, laws and norms to be adhered by engineers during their working

# LIST OF PRACTICAS

- Steps how to effectively write different types of Letters.
- Steps to make a Presentation in Power Point.
- Steps to make a Resume more effective.
- Steps to conduct Telephonic/On-line Interview (Through skype/Google Hangout).
- Study of Different Techniques of Stress Management.
- Study of Rules & Ethical practices to be followed at Workplace.

# **Trainee's Evaluation Sheet**

We are always keen to receive your views on the trainee's. The feedback you give allows us to continually adapt /train our students to better suit your needs. We would appreciate it if you could spend a few minutes filling in this form before the Trainee leaves (please hand it to the trainer when you've finished).

All feedback will be treated in the strictest of confidence.
